CAPABILITIES

High Point Audiological delivers large-scale mobile hearing testing supported by nine fully equipped units capable of completing up to 100 audiograms per hour. Each unit accommodates groups of four, six, or eight individuals at a time, enabling completion of 2215 and 2216 audiograms within five minutes per test cycle. Eleven Doctors of Audiology conduct CAE, Sprint, and MOHT testing to ensure clinically accurate results across all participant groups. High Point Audiological also provides DOEHS data entry with MEDPROS import completed within seven business days, supporting efficient medical readiness processing. Additional services include mobile hearing assessments, Benson audiometer calibration, and high-efficiency testing workflows designed to meet the demands of large personnel populations across multiple locations.

CORE COMPETENCIES

- Audio Testing - 2215's and 2216's
- DOEHS Entry
